

OBD touchscreen topometer *TO400*

This measuring tool is plugged into the OBDII socket of recent vehicles.

It enables precise distance measurement **without requiring the installation of a sensor on a wheel.**

Calibration is very easy to do, fast and precise. 10 calibrations can be stored if the device is shared between several vehicles.

Distances can be fixed and corrected, to the nearest meter, with the touch screen.

It allows direct calculation of road surfaces by indicating road widths.

Compatible vehicles (PV ou CU):

- Peugeot / Citroën group (whose last Opel) with automatic management of reverse gear,
- Fiat group,
- Renault, Nissan ...
- other vehicles are also compatible, please contact us.

The installation/unintallation on the OBDII socket is done in **2 minutes** without damaging the vehicle for power supply and taking speed and mileage information.

If the Ignition power is on the OBDII socket, then the device **switches on automatically** when the ignition is switched on.

A CRISARTECH topometer is:

- a display made in **Germany**, software and accessories in **France**, a **guarantee of quality and very high level** pre/after sales service,
- **ergonomics of the highest order** (touch screen, menus, pop-up...),
- **excellent readability** thanks to the **color**,
- **multilingual menus and configuration** (F/GB/E/D/I).

Options:

- suction cup holder,
- bracket to be screwed onto the dashboard

Specifications (without holder):

- dimensions: 140x95x48 mm
- screen 94x54 mm
- weight: 350 g
- power consumption: 0.2 to 0.3 A at 13.7 V
